

Installation of 'Car Builder' Software 8.x

1. Insert the Car Builder CD-ROM into the CD-ROM drive.
2. Install the Car Builder software to the default location on the local c: drive of the PC it is to be run from.
3. **Important:** Car Builder requires 'QuickTime' to be installed to operate correctly. If 'QuickTime' is not already installed on the computer, it can be installed from the Car Builder CD-ROM by running the file 'QuickTimeInstaller.exe'.

Car Builder License

Car Builder is only licensed to be installed onto one computer.

Version 8.x

Licensing the software can be done immediately if the computer has an Internet connection. If there is no Internet connection available, licensing can be done over the telephone. Follow the on-screen instructions.

The CARX launch code now needs to be modified to allow it to call Car Builder 8.x

4. Open up Launcher Setup Program
5. Select the options tab
6. Click on the 'APPS' button in order to show a list of all available application codes.
7. Select Carx from the list
8. Click on the edit button on the right hand side of the list
9. Alter the path of the application to read

C:\Ljcai\Appswch4.exe C:\Document and Settings\All Users\Car Builder Install\Run Car Builder.exe /Ljenh

10. Close down launcher setup saving all changes

Testing Software Installation

From the Launcher, enter each of the **Launch codes** given in the 'Assignment Details' table in this Instructor's Guide. Ensure the appropriate software
